Employment

January 2026 - present *Associate Professor*
School of Mathematics and Statistics, Beijing Technology and Business University, Beijing, China

September 2022 - December 2025 *Lecturer*
School of Mathematics and Statistics, Beijing Technology and Business University, Beijing, China

Education

September 2017 - July 2022 *Ph.D. in Statistics*
School of Mathematical Sciences, Peking University, Beijing, China.
Advisor: Prof. Yangbo He

September 2013 - July 2017 *B.S. in Mathematics*
School of Mathematical Sciences, Capital Normal University, Beijing, China.

January 2026 - June 2026 *Visiting Scholar*
Department of Pure Mathematics and Mathematical Statistics, University of Cambridge, Cambridge, UK.
Host: Prof. Qingyuan Zhao

Research Interests

My research primarily focuses on causal inference, with specific interest in the following areas:

1. Causal effect: covariate adjustment, data fusion, instrumental variables, measurement error, principal stratification, propensity scores, spillover effects
2. Causal attribution: individual attribution analysis, continuous outcome attribution
3. Causal discovery: Bayesian networks, causal mechanisms of latent confounders, proximal variable selection
4. Missing data: nonignorable missing data

Publications

1. Shanshan Luo, Yingying Wang†, Mengchen Shi†, and Yue Zhang*. Improved inverse probability weighting estimation and its application to predictive covariates. To appear in *Statistical Methods in Medical Research*, 2026.
2. Yafang Deng†, Kang Shuai, and Shanshan Luo*. Bidirectional causal inference for binary outcomes in the presence of unmeasured confounding. To appear in *Statistica Sinica*, 2026.
3. Shanshan Luo, Wei Li, Xueli Wang, Shaojie Wei*, and Zhi Geng. Assessing interactive causes of an occurred outcome due to two binary exposures. To appear in *Biometrics*, 2026.
4. Jiaqi Min†, Xueyue Zhang†, and Shanshan Luo*. A regression-based approach for bidirectional proximal causal inference. To appear in *Journal of the Royal Statistical Society: Series A*, 2026.
5. Shanshan Luo, Mengchen Shi†, Wei Li*, Xueli Wang, and Zhi Geng. Efficiency-improved doubly robust estimation with non-confounding predictive covariates. *Electronic Journal of Statistics*, 2025; 19(2): 3723–3742.

6. Shanshan Luo and Zhi Geng*. Discussion on "Causal and Counterfactual Views of Missing Data Models". To appear in *Statistica Sinica*, 2025.

Awards
Grants

Outstanding Graduate of Beijing, 2017.

National Scholarship, 2021.

Outstanding Graduate of Beijing, 2022.

Young Scientists Fund (Type C) of the National Natural Science Foundation of China (NSFC), January 2025 - December 2027.

Young Elite Scientists Sponsorship Program of the Beijing High Innovation Plan, Beijing Association for Science and Technology, December 2025 - December 2027.

Teaching Experience

Applied Stochastic Processes: Fall 2022

Multivariate Statistical Analysis: Spring 2023, Fall 2023, Spring 2024, Fall 2024, Spring 2025

Causal Inference: Spring 2023, Fall 2023, Fall 2024, Spring 2025

Probability Theory and Mathematical Statistics: Fall 2026

Student
Supervision

2023: Jiaqi Min (Master's, graduated July 2026); Xueyue Zhang (Master's, graduated July 2025).

2024: Yafang Deng (Master's, graduated July 2026); Zhiqiang Li (Master's, graduated July 2026); Taiyan Liu (Master's, graduated July 2026); Yingying Wang (Master's, expected July 2027).

2025: Jia Lin (Master's, expected 2028); Wenshuo Xu (Master's, expected 2028); Zhiyuan Zhu (Master's, expected 2028).

2026: Yi Qin (Ph.D., expected 2030); Tianyi Bai (Master's, expected 2029); Mengfan Xu (Master's, expected 2029); Zhen Zhang (Master's, expected 2029).
